BUREAU OF STATISTICS

June 2009

1 Consumer Price Index (CPI), All Items, 2002 = 100

Month	CPI	Annual Rate of Inflation	
Whitehorse			
June '09	114.9	0.3%	(June '08 to June '09)
May '09	114.0	0.4%	(May '08 to May '09)
June '08	114.6	4.5%	(June '07 to June '08)
Canada			
June '09	115.1	-0.3%	(June '08 to June '09)
May '09	114.7	0.1%	(May '08 to May '09)
June '08	115.4	3.1%	(June '07 to June '08)

Comparing the month of June 2009 with June 2008, the **annual** rate of inflation in Whitehorse (0.3%) was 0.6 percentage points higher than the **annual** rate of *deflation* in Canada (0.3%). This is the lowest rate of inflation for Whitehorse since December 2006 and the lowest rate of *deflation* for Canada since August 1955.

On a **monthly** basis, in Whitehorse (figures for the Yukon are not available) overall prices **increased 0.8%** from May to June 2009.

Major **monthly increases** were seen in the following CPI commodities:

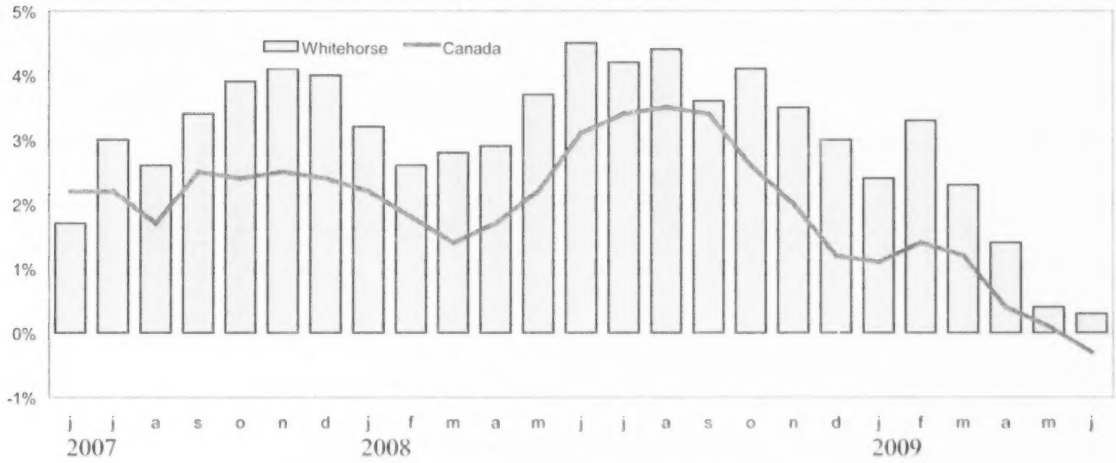
- gasoline
- inter-city transportation
- personal care supplies and equipment

Some of the major **decreases** partially offsetting **monthly** increases were:

- men's clothing
- bakery products
- fresh or frozen chicken

Annual increases for Whitehorse in June were in rent, cigarettes and mortgage interest cost. Offsetting some of these **annual** increases were decreases in gasoline, fuel oil and other fuels and electricity.

Inflation Rate



Each bar represents a month of the year, with the first letter of the month's name listed below the bar.

All-Items excluding Energy	113.3	112.7	109.5	0.5	3.5

The Consumer Price Index (CPI) is produced on a monthly basis by Statistics Canada. The data used to determine the CPI are collected by survey and the results are released in Statistics Canada publication The Consumer Price Index, catalogue no. 62-001. The Index is used to determine price change (inflation) in a given city or province over time. In order to calculate the inflation rate in an area, an index for two time periods is required. The percentage change in this index from one point in time to the next is known as the 'rate of inflation' (or 'rate of deflation' if there is a decrease).

The current official time base of the Consumer Price Index (CPI) is 2002 = 100.
